Subject: American Society of Civil Engineers (ASCE) – [\*Standard Practice for Sustainable Infrastructure \(73-23\)\*](#)

Dear Federation's Members and Associates,

The American Society of Civil Engineers (ASCE), an Affiliate Member of WFEO has published the subject standard in 2023. The Standard was published to promote sustainable infrastructure solutions through the entire infrastructure life cycle and was developed through a consensus development process accredited by the American National Standards Institute to ensure openness, balance, consensus and due process.

The Standard can be used on infrastructure solutions of any scale, and the principles outlined can be adapted to any region worldwide to meet local needs.

WFEO's Executive Board has reviewed the document and believes that the principles outlined in the standard align with WFEO's mission, the Sustainable Development Goals, and generally accepted practices by our membership.

Therefore, WFEO endorses the document and supports its wider use, and encourages its member institutions to share the Standards with their own membership.

Yours sincerely,

Mustafa SHEHU  
WFEO President
